National Entitlement Card Scheme - Common Glossary of Terms

22 December 2021

The following terms are used in various Information Assurance documents published about the scheme.

| Term | Meaning |
|---|---|
| Agent (individual Local Authority Agent) | An official acting on behalf of a Local Authority who assists in managing National Entitlement Cards for their area. They are an employee either of the Local Authority or of an organisation acting on behalf of the Local Authority such as SPT, and will usually have access to the NEC CMS as their role requires. However, not all LA Agents will have access to CMS. |
| Agent (organisation acting on behalf of Local Authority) | An organisation acting under instruction from a Local Authority that assists in managing National Entitlement Cards. Examples of agents may include SPT, Arms- Length External Organisations such as a Leisure Trust, or a private company tasked with managing the collection or entry of data on behalf of an individual Local Authority. |
| Applicant ID | The Applicant ID refers to a unique system identifier assigned within CMS for the record corresponding to an individual applying for an NEC. For a large number of Customers, there will be a single Applicant ID; however, individuals may have multiple Applicant IDs if separate applications have been made by the Customer over time. Only in very few cases are multiple Applicant IDs active at any given time for a single Customer and these are linked Applicant IDs; these are linked within the system to allow the Customer's records to be managed effectively. |
| Application ID | A unique Application ID may be assigned to each application received. Paper forms have this identifier pre-printed on them, other applications received directly into the system, or electronically by datafile may be assigned an Application ID as the CMS record is created. The Application ID is shared with the Customer's Local Authority and serves as an audit cross-reference to forms submitted. |
| Authentication | The process of determining whether someone is who he or she is declared to be. This is usually carried out by presenting credentials e.g. supplying a username and password to a computer system. Authentication merely ensures that the individual is who he or she claims to be, but says nothing about the access rights of the individual. |
| Back-office | Refers to processes which are not normally visible to be public, e.g. the re ordering |
| Business As Usual (BAU) | of stock for a shop. The normal execution of operations within an organisation, in contrast to a situation where circumstances are hindering or preventing normal execution of operations. |
